

TouchLay nova

Hello, we are [TouchLay GmbH](#)

TouchLay is a software and hardware company, specializing in interactive design and user experience. We develop products that help companies present their products, as well as improve and simplify the cooperation between employees and customers. We quickly react to new trends and wishes of our customers.

TouchLay nova

The TouchLay nova is a 55 inch multitouch screen. It is possible to rotate it, and use it in landscape or portrait mode.

We also provide software solutions that automatically generate a presentation from your existing data. Simply select data sources, design and layout with a few clicks. Our software will generate a suitable presentation, which can be used on the nova or embedded on your own website.

Flexible Design

Adjust the nova, any way you want

Impressive Presentations

Create your own interactive presentation through our software platform

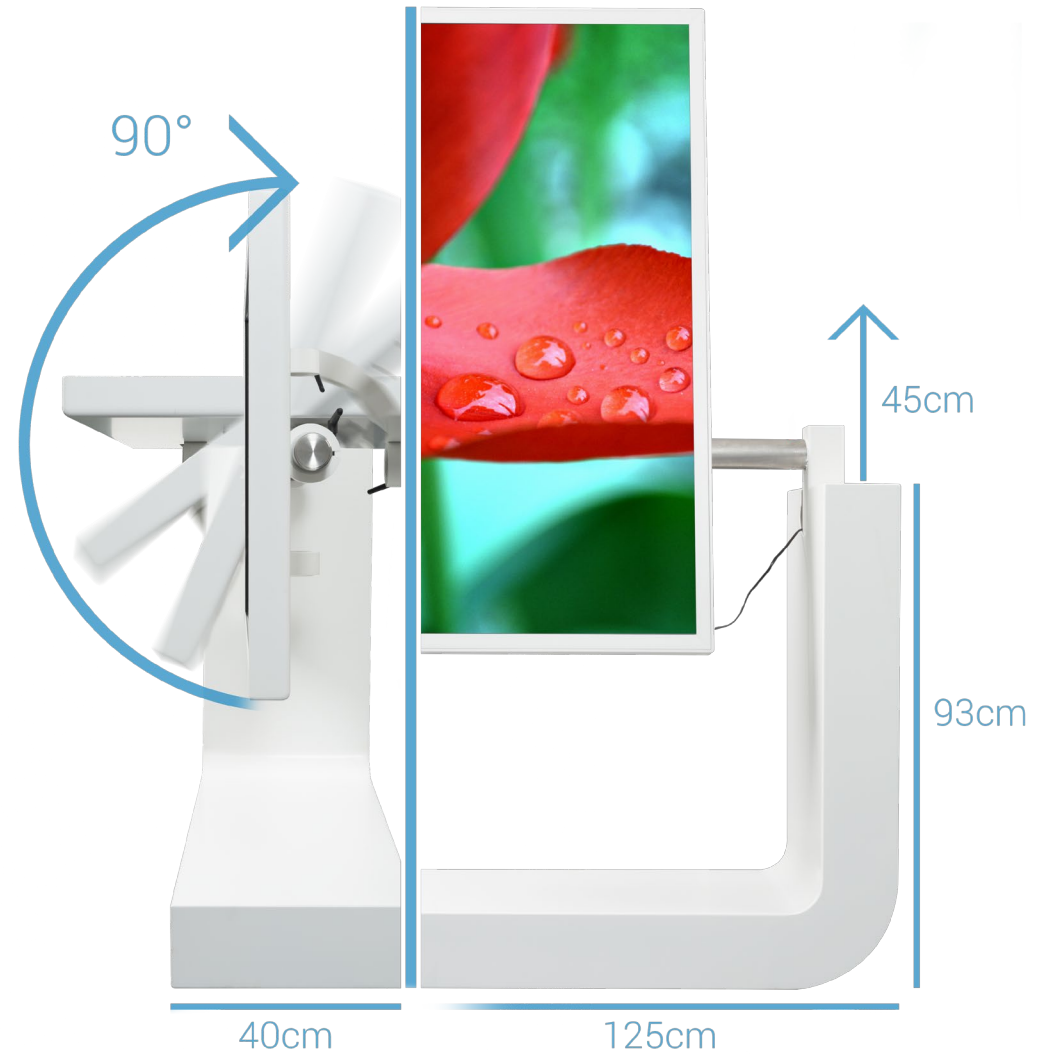

Precise Multitouch

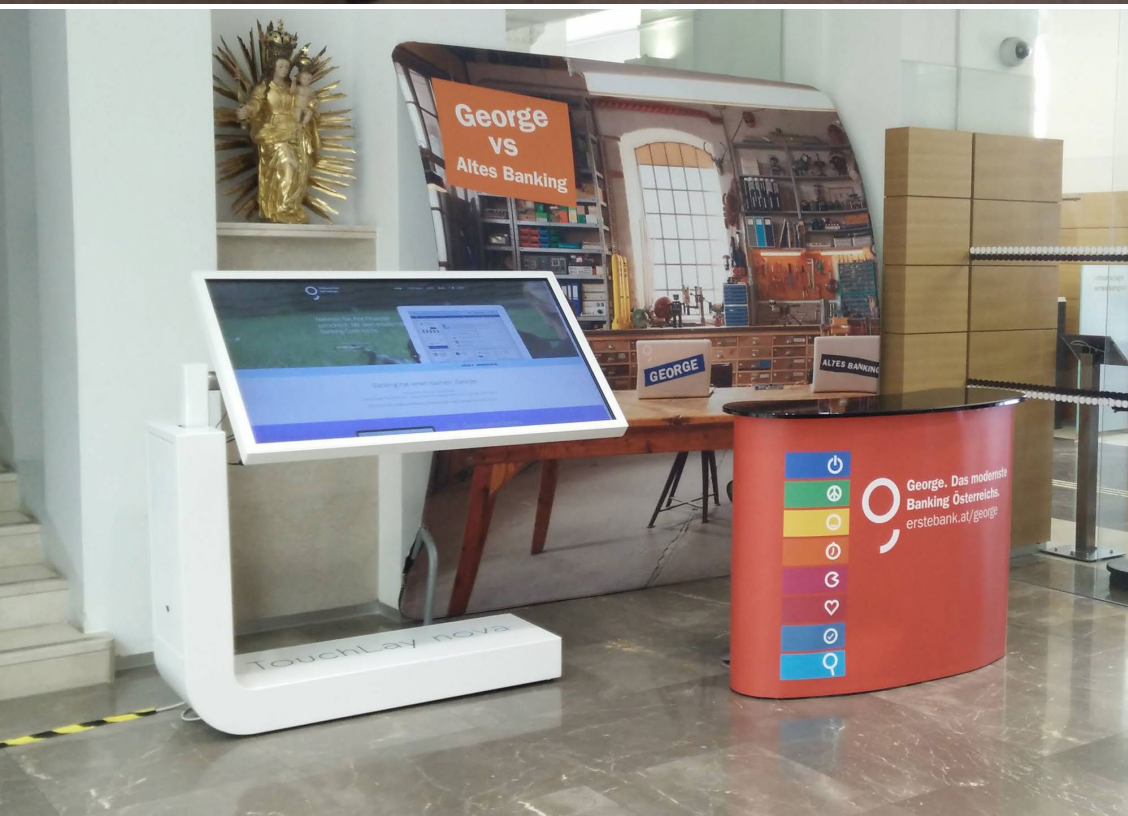

The nova can simultaneously detect 2 to 32 fingers and objects (up to 1.5mm)

Operating System

Windows 10 / Android
